

BiO-STiX Drain Cleaner & Deodorizer

Looking for a way to keep your drains unlogged without damaging the environment or your health?

Consumer recognition of the hazards of many chemical ingredients found in products used in the home has created an increasing demand for natural alternatives.

BiO-STiX contains active natural BiOWiSH™ enzymes which are completely safe and effective for use in unblocking drainpipes of sinks, bathtubs, toilets and showers. By simply pushing one into the grate in your drain you can witness the **BiO-STiX** in action, rapidly breaking down grease, fats, hair, soap, detergents and food scraps. Unlike sodium hydroxide, **BiO-STiX** are non-chemical, non-caustic and will not facilitate combustion.

BiO-STiX is the easiest and most cost effective regular maintenance you can perform not only for your drains, but also for your septic system. The best approach is to replace your **BiO-STiX** on a monthly basis and the enzymes will continue to grow and break down organic matter in your drains.

BiO-STiX are ideal for:

- Kitchen and laundry sinks
- Vanities
- Bathtubs and showers
- Sanitary and utility tubs

When to use BiO-STiX?

When drains....

- Become slow to drain away
- Surge back up bringing dirty water
- Are visually dirty
- Emit odor
- Attract cockroaches or rodents

And every month as a low cost preventative maintenance.

Benefits of Use

- Fast acting and effective removal of all organic waste
- Rapidly removes rather than masks odors
- Lasts up to 30 days
- Cost effective
- Boosts septic system operation
- Improves greywater clarity
- Reduces gas pressure build-up in pipes
- Eliminates odor causing compounds that attract cockroaches and rodents
- 100% natural and non-toxic

Uses

- Blockage removal
- Odor removal
- General drain cleaning
- Preventative maintenance

Packaging

- 3 pce blister card

Instructions for Use

1. Gently twist and remove the white plug on top of the BiO-STiX and dispose in recycling.
2. Simply push 1 x BiO-STiX into grate at top of drain.
3. Ensure that the stick does not fall through. If your drains have large openings you can simply turn the BiO-STiX upside down and top firmly to release the core. Drop this core directly into the drain and it will break down naturally as it releases the enzymes which clean and dedorize your drains.
4. Use sink/drain as normal.
5. Remove BiO-STiX after 30 days and discard into plastic's recycling (the core will simply break-down).
6. For best results avoid pouring boiling water or disinfectants down the drain as this impedes the enzyme action.
7. Repeat every 90 days or as required.
8. Register for your free reminder at www.biowishtechnologies.com/reminder
