

Cleaner & Deodorizer

Complete Odor Removal

BiOWiSH Technologies are committed to launching a range of products that utilize our proprietary enzyme technology whilst improving environmental outcomes.

Cleaner & Deodorizer has proven to be a very effective cleaning product in commercial and industrial applications. This is shown through its many current users and positive customer experiences.

The product is 100% natural, non-toxic and assists with completely removing waste, pollution and contamination from the environment. It provides a natural anti-microbial action to remove pathogenic bacteria leaving areas clean and hygienic.

Cleaner & Deodorizer utilizes the unique core BiOWiSH™ Enzyme Technology to quickly remove odors at the molecular level and does not simply mask odors as is common with many deodorants or deodorizers. Additionally, there is a residual action that continues to remove odors in between applications.

We are now developing this technology into a format suitable for a household cleaning product. For ease of use and to maximize the environmental benefits we propose to deliver this product in a **'tablet form'** that is inserted into water, dissolved and used via a spray bottle that will be branded with a newly developed name.

Mixing Instructions

1. Use 1 tablet per pint (500ml) of water in a spray bottle.
2. Use warm water less than 140°F (60°C).
3. Shake well and allow to stand for 20 minutes to activate enzymes.
4. Use solution within 48 hours. Solution can be refrigerated to extend life to 7 days.
5. Pour unused solution down drain for additional drain cleaning and deodorizing.

Benefits of Use

- Digests and removes fats, oils, greases and dirt (does not emulsify)
- Eliminates odors at the source (does not mask them)
- Long lasting protection on grouts and carpets
- Supports natural action of grease traps, septic systems and waste water treatment plants
- Does not contain phosphates, detergents and solvents
- 100% natural and non-toxic
- Reduced impact on the environment (less packaging, transport and storage)

Applications

- This product is recommended for commercial cleaning applications

Packaging

- 20 dissolvable tablets (makes 2.5Gal)

Uses & Applications

Kitchen Surface Cleaning

- Spray and wipe surface as required.

Bathroom Surface Cleaning

- Spray and wipe surface as required.

Urinal Cleaning & Deodorizing

- Spray urinal surface and surrounding wall and floor areas. Do not rinse.

Carpot Spot Cleaning

- Spray affected carpet with prepared solution until just damp. Leave for 15 minutes.
- Blot with cloth or paper towel to absorb wetness.

Spills & Incontinence

- Collect and remove as much solids and liquids as possible.
- Spray the affected areas.
- Blot with cloth or paper towel to absorb wetness.
- Apply final spray to remove odors.

Waste Transfer Rooms

- Spray all surfaces
- Repeat as required.

Odor Removal

- Spray directly onto odor source and into surrounding air.
