

Garbage Bin Wash

Deodorizes and Sanitizes

Garbage Bin Wash provides a cost effective, environmentally friendly way to clean and deodorize garbage bins of all sizes.

Household garbage and rubbish bins are a haven for pests and bacteria which are the main causes of odor problems. If left unclean, garbage bins can also be a health and hygiene hazard. Typical maintenance methods, such as hosing garbage bins with water, do not remove odor and bacteria and impact upon water conservation and the environment.

Garbage bins require a regular cleaning and maintenance routine to remain deodorized and sanitized.

Garbage Bin Wash is ideal for:

- Odor removal
- Sanitizing
- General cleaning

Why should you clean your bin every 4 weeks?

There are many diseases in and around your garbage bin that you should be wary of, including Weils, Salmonella, E.Coli, Listeria, diseases from rodents and many more that can start to grow within hours of discarding waste into the garbage bin. Regular cleaning with **Garbage Bin Wash** assists in keeping your garbage bin clean and in a hygienic state.

Did you know.....?

In many regions, it is illegal to clean your garbage bin simply by hosing and allowing the waste water to run off into the gutter or onto the road. By doing this, you are creating storm water pollution which is an offence under many local regulations.

Garbage Bin Wash does not contain any detergents, phosphorus sources and chemicals. It digests or decomposes the wastes it washes from your garbage bin and as a result, waste water can be safely spread on lawns or garden areas.

Benefits of Use

- Removes rather than masks odors
- Reduces organic compounds that attract insects and rodents
- Used solution can be poured over lawn or garden to assist in soil nutrient release
- 100% natural and non-toxic
- Harmless to humans and the environment

Uses

- Kitchen trash cans
- Wheelie bins
- Recycling containers

Packaging

- Set of 6 single use packets in a box

How can you maintain your garbage bin in a clean and hygienic state?

By regularly cleaning your garbage bin every 4 weeks with **Garbage Bin Wash** you are maintaining the hygiene of your garbage bin and decreasing the chances of it being a source of harmful bacteria and odor. It is safe and easy to use and ideal for keeping your garbage bin clean and odor free.

You may also consider helping the environment further and composting your organic waste. By keeping this out of your garbage bin, you are ensuring that it will remain free of rotting matter. For effective and easy home composting, please ask your retailer for **BiOWiSH™ Compost Boost**.

Instructions for Use

1. Insert 1 filter bag in up to 1 US Gal (5L) of cool to warm water. Wait 10 minutes to allow total enzyme activation.
2. Spray, splash or brush the solution thoroughly over all garbage bin surfaces.
3. No rinsing is required. Please conserve water and allow garbage bin to dry naturally.
4. Repeat monthly or as required. Make sure unused filter bags are kept dry to prevent activating the enzymes.
5. Filter bag makes for excellent composting which is beneficial for the environment. Excess solution can be discarded safely on lawns and gardens.
